SUMMARY

Software Engineer with 3+ years of experience designing, developing, testing, deploying, and maintaining full-stack and backend software at production scale across web and mobile (Android, iOS, iPad, web) clients. Experienced in system design, system integrations, distributed systems and large-scale data migration with a strong record of code review, engineering best practices, technical documentation, CI/CD, automated testing and production debugging. Includes hands on experience building accessible user-facing features and a strong foundation in data structures and algorithms.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, React, TypeScript, SQL, HTML & CSS
Data Structures & Algorithms: 1300+ problems solved across platforms | [Profile Link](#)
Backend / Systems: Node.js, Django, ASP.NET Core, REST APIs, Distributed Systems, System Integrations
Infrastructure & Cloud: AWS, Docker, PostgreSQL, Firebase, Azure DevOps, CI/CD
Testing & Reliability: Python Robot Framework, Selenium, Postman, Automated Testing
Platforms: Android, iOS, iPad, Web

EDUCATION

RR Institute of Technology <i>B.E. in Computer Science & Engineering</i>	Jun 2020 – Jun 2023 <i>Bangalore, India</i>
Rajendranath College of Polytechnic <i>Diploma in Computer Science & Technology</i>	Sep 2017 – Nov 2020 <i>Durgapur, India</i>

EXPERIENCE

Tech Sprint <i>Software Engineer Swift, SwiftUI, React Native, Node.js, ReactJS</i>	Apr 2024 – Aug 2026 <i>Remote, India</i>
- Built and shipped Insights by RestoGenius, a native iOS app (Swift, SwiftUI, Combine) published on the App Store (also on Google Play), with real-time dashboards for orders, revenue, and staff management. - Shipped RestoGenius Go and RestoGenius (also on Google Play), native iOS apps published on the App Store, owning UI architecture and REST API integration in SwiftUI for a no-reload, responsive experience across iPhone and iPad. - Worked on RestoGenius, a hospitality POS live across 10+ Australian venues, spanning kiosk, online ordering, and loyalty across iOS, iPad, Android, and web; built the end-to-end ordering flow (menu, cart, combos, payments) into a single unified system. Also participated in technical design discussions with engineers to evaluate implementation approaches, system architecture and feature trade offs. - Built the Uber Eats integration, replacing manual two-place menu syncing and implemented role-based access and multi-restaurant switching so managers securely manage data across venues from one app.	
Computer Solutions East Inc. <i>Software Developer C#, ASP.NET Core, ReactJS, TypeScript, SQL, Azure DevOps</i>	Mar 2024 – May 2024 <i>Remote, India</i>
- Developed full-stack (backend and frontend) features for a B2B sales intelligence platform, surfacing buyer journey stages and prioritization signals to help sales teams act on high-intent leads. - Wrote and executed SQL migration scripts moving 60,000+ production records into a redesigned PostgreSQL schema via Azure DevOps with zero data loss and no downtime, unblocking a dependent feature release.	
Adevu <i>Software Engineer Python, Django, ReactJS, Docker, AWS, Robot Framework</i>	Jun 2023 – Mar 2024 <i>Remote, India</i>
- Designed, developed, and deployed frontend and backend modules for a Hotel Management System on AWS using Docker, covering room inventory, reservations, and role-based access control. - Developed an accessible admin module with in-platform guidance for hotel staff, applying accessible-technology practices to improve usability. - Reviewed code across features and tests, giving feedback on correctness, style, and testability to enforce engineering best practices; maintained feature and testing documentation, adapting it with each release. - Set up test plans using Python Robot Framework covering 60% of the codebase and wired CI/CD pipeline failures to Slack alerts, reducing regression risk and enabling near real-time triage of broken builds before reaching production.	
Adevu <i>Frontend Engineer Intern ReactJS, Python, Django, AWS, Figma</i>	Dec 2021 – May 2023 <i>Remote, India</i>
Contributed 1000+ lines of production code across core Hotel Management System modules including dashboard, room bookings, rates, and reporting screens used daily by hotel staff.	
Techbiz Innovators <i>Software Engineer Intern HTML, CSS, JavaScript, PHP, Figma</i>	Oct 2021 – Apr 2022 <i>Remote, India</i>
Built a responsive e-commerce site with 10+ pages including product browsing, category filters, and an admin panel for managing product attributes and inventory.
